## SKILLS

---

**Proficient:** Javascript, Git, React, Redux, Postgres, Sequelize, Express, Node

**Knowledgeable:** Heroku, OAuth, Firebase, React Hooks, CSS, HTML

**Familiar:** MongoDB

## PROJECTS

---

**TechTracker** | Group Project | [View Project](#)

*Ecommerce Site*

- Created full cart functionality via Redux and maintained persistence through sessions using local storage
- Enabled admin-only rights through custom express routes
- **Technologies used:** React, React-Router, Redux, Node, Firebase

**WonTuFiddy** | Solo Project | [View Project](#)

*Click-Based Game*

- Single player game with three modes
- Created unique functions to shuffle indexes for the game board with React and Redux
- Enhanced and challenged my CSS skills through trial and error

**Calamity Monitor** | Group Project | [View Project](#)

*Progressive Web Application*

- Displays data on Covid-19 on a global map, and retrieves top news headlines
- Created a Covid-19 simulation with D3, which showed how people interacting can spread the virus. Also implemented a parallax scroll.
- **Technologies used:** React, Javascript, MaterialUI, React-Spring, D3, ArchGIS

**99Cent** | Solo Project | [View Project](#)

*Ecommerce Site*

- Amazon clone completed alongside Youtuber 'Clever Programmer' with my own twist
- Includes Google and Facebook OAuth, full backend by Firebase, and payments with Stripe
- **Technologies used:** ReactJS, Firebase, Stripe

## WORK EXPERIENCE

---

**Chipotle**

*Assistant General Manager*

*Mar 2016 - Feb 2020*

- Conducted interviews and trained 20-25 new hires
- Developed goals to improve daily sales by \$100+ and save 3-5 hours of labor
- Acted as the food safety leader to 10-13 crew members
